

# IDEAS

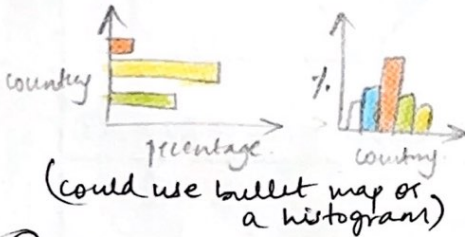

①

Over tourism & Under tourism (geo map marking the countries)

②

Over tourism Percentage

③ Under tourism Percentage

④

Tourism Development Index Values

④ (can use bubble chart)

⑤ (a treemap can be used to show income bracket per region).

⑤ Income levels.

# FILTER

→ Filters can be added for:-

- (i) both the percentage charts to filter by percentage value
- (ii) tree map to show particular income bracket or particular region in it.
- (iii) bubble chart with respect to year

# CATEGORISE

→ Under and Over Tourism can be separated for clearer representation.

→ Restrict years for index to see recent trends

→ Avoid pie chart for clarity for this particular data.

# COMBINE & REFINE

This bubble chart holds 4 attributes in total :-

- (i) year (x-axis)
- (ii) index (y-axis)
- (iii) colour (country)
- (iv) Size (rank)

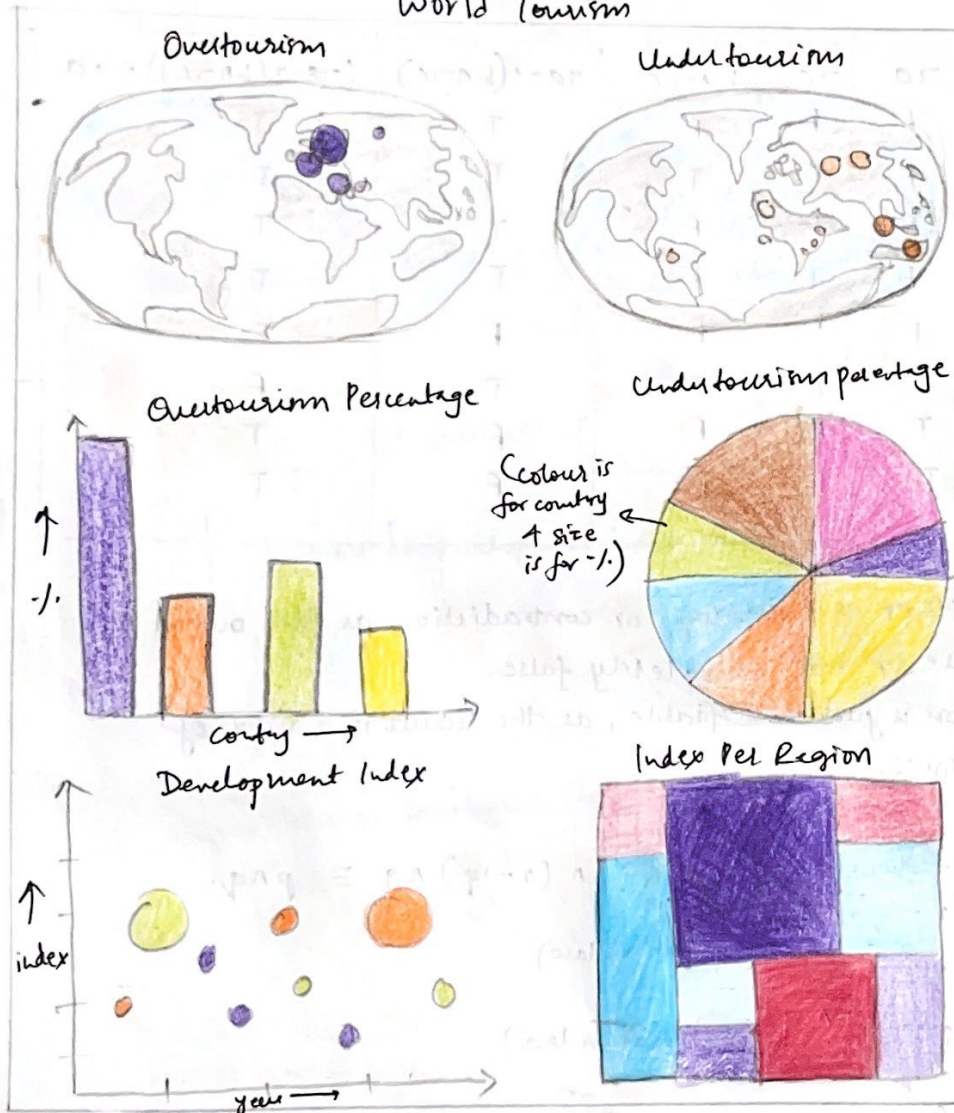

# QUESTIONS

- 1. What colour palette can be used?
- 2. Does this visualisation cover the relevant topic?
- 3. Are the topics too less or too much?
- 4. Rethink all the ideas.

# LAYOUT

## World Tourism

TITLE - Visualisation

AUTHOR:- Aditi Gupth

DATE:- 13/10/2024

SHEET:- 2

TASK:- Generic Style

## OPERATIONS

- Filters are added in all the necessary idions.
- Calculations are done on excel.
- data is loaded into github to make pages on it.
- Cleaned data is uploaded.
- Texts and descriptions are to be added.

## FOCUS

- The split is made for clarity.
- Top 10 countries for each category.

the size of the bubbles are dependant on no. of tourists and the colour here is for no. of locals.

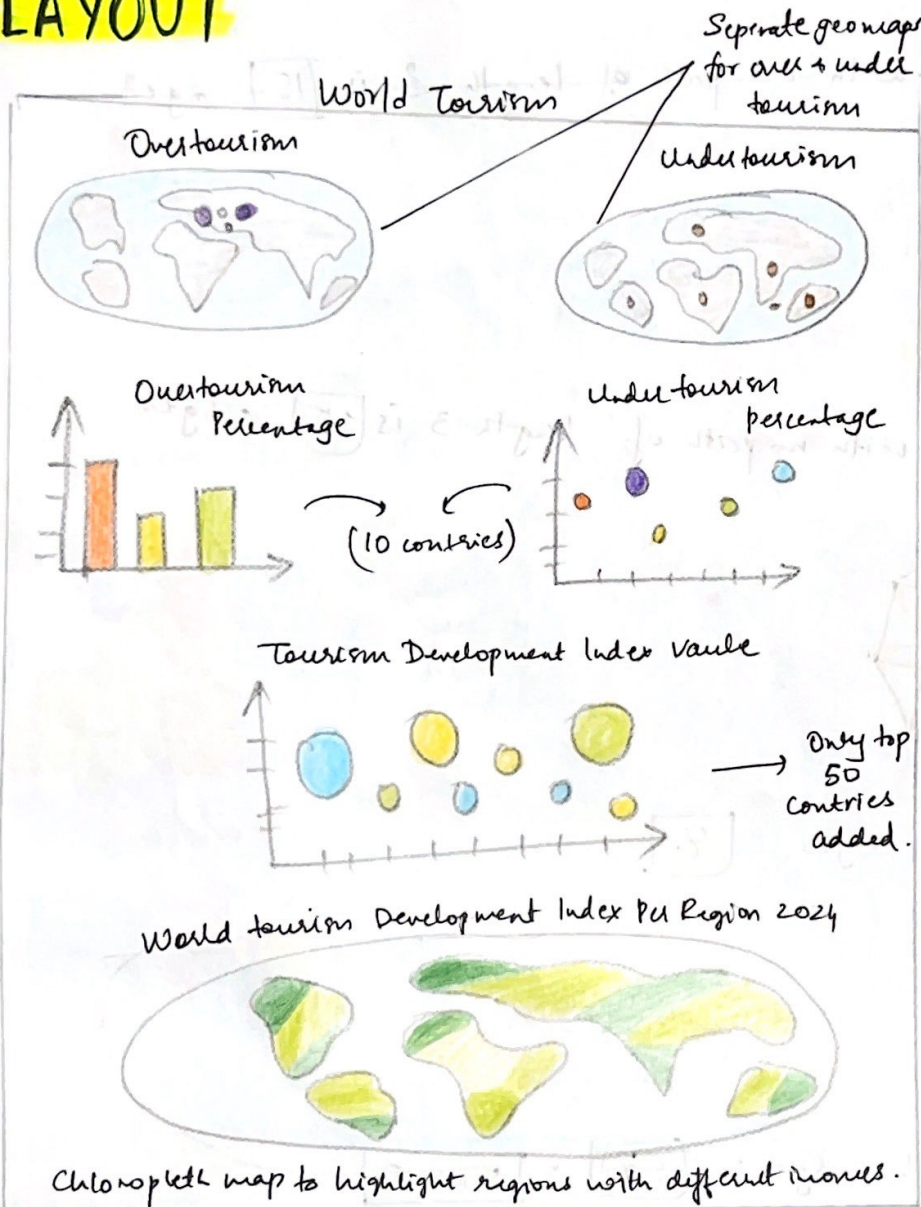

These show trends all over the world for tourism.

## DISCUSSION

- Treemap highlights the region based on the income bracket.
- are all the idions efficient enough?
- is the pie chart clear enough?

# LAYOUT

 SHEET:- 3  
 TASK:-  
 Generic Style

## OPERATIONS

- Tooltip to be added to all the maps to highlight all the relevant info.
- Calculations are done on excel.
- Data is preloaded.
- Github is used to deploy pages.
- Filters to be added whenever relevant.

## FOCUS

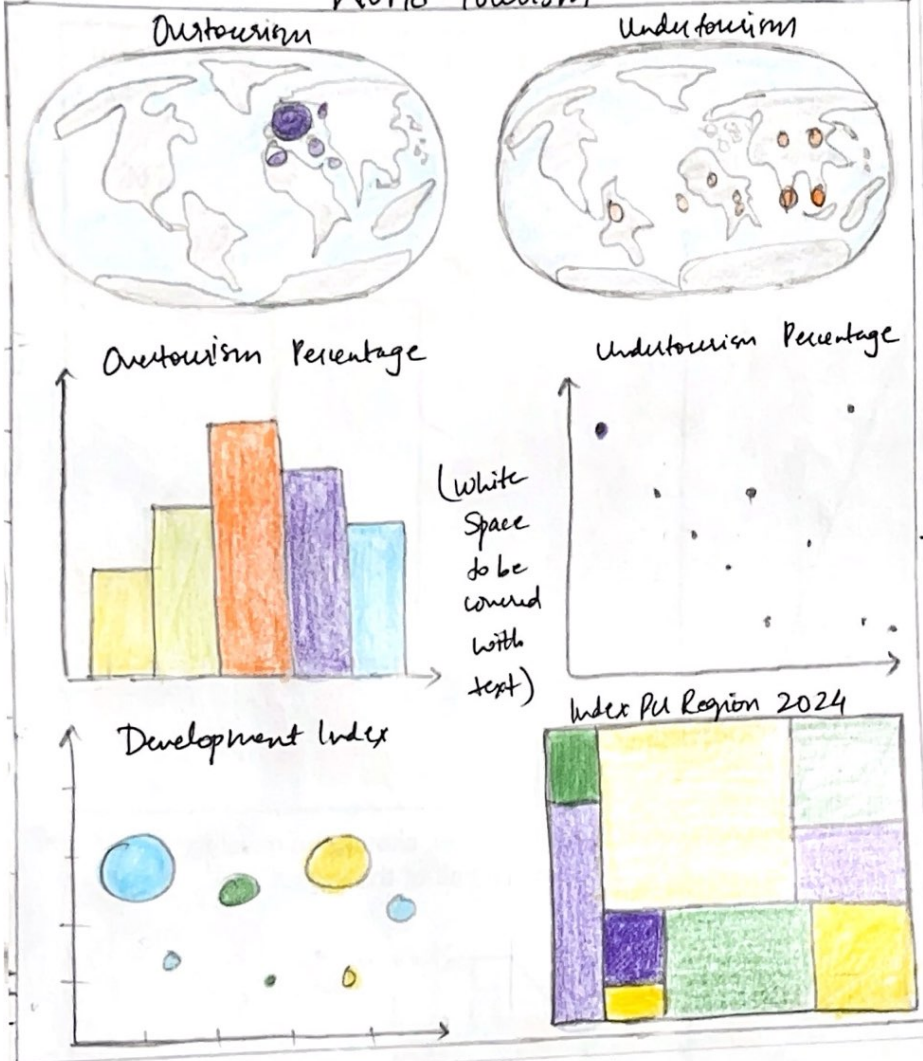

These maps hold the data for the top 10 countries and marks the percentage per country between locals & tourists.

## DISCUSSION

- Geo map divided into 2 for clarity.
- Bar chart chosen for percentage
- Geo map idiom chosen for WTDI to highlight regions.

# LAYOUT

## World Tourism

## FOCUS

### Thermal Heatmap

This shows trends of sustainable tourism worldwide

TITLE:- Visualisation

AUTHOR:- Aditli Gupta

DATE:- 13/10/ 2024

SHEET :- 4

TASK:- PreFinal Design

## OPERATIONS

- Tooltip to be added to every idiom
- hover to see tooltip details for all
- Relevant Filters to be added to all idioms.
- Data to be loaded into a github repo.
- legends to be added for clarity in all the relevant idioms.

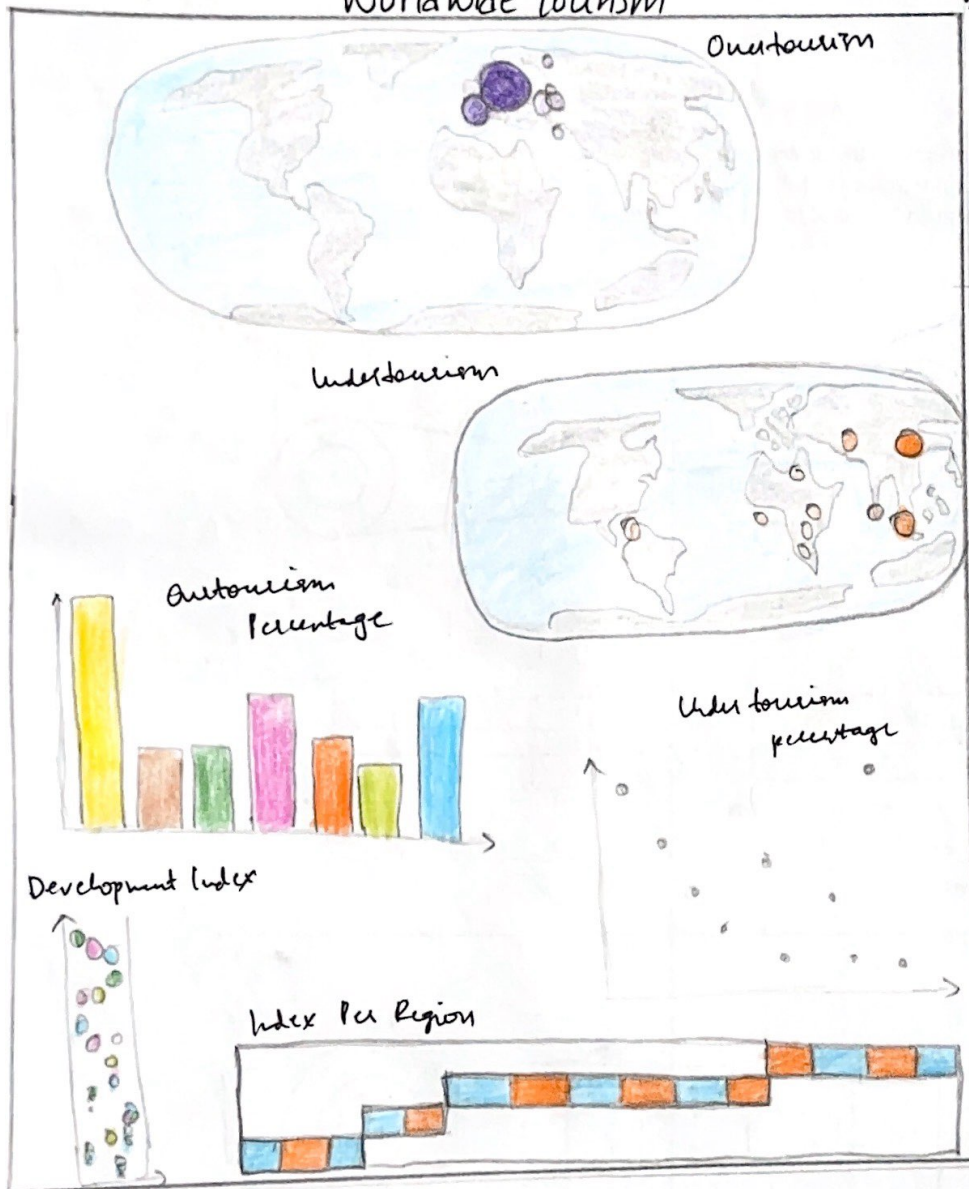

## DISCUSSION

- Is the heat map efficient? Rethink.
- Scatterplot is a better idiom for the percentage
- Bubble chart is a suitable idiom
- 2 geo maps have been included in total.

# LAYOUT

## Worldwide Tourism

# FOCUS

(Treemap is suitable for the chosen dates etc)

TITLE:- Visualisation

AUTHOR:- Aditli Gupta

DATE:- 13/10/2024

SHEET:- 5

TASK:- Final Design

## OPERATIONS

→ Filters include:-

(i) Locals outnumbered by tourists percentage for both overt + undertourism.

(ii) Treemap by the Income group.

→ Tooltip included in all 6 graphs.

→ Github repo made to add all the data + make pages.

## DISCUSSION

→ Treemap is more suitable idiom

→ 6 graphs included to show overall trends in tourism all over the world

→ bubble chart has been made visible.

→ overall suitable idiom are chosen.
